

**Equalizer® 1 x 1 Vacuum Cleaner**

*Portable, compact wet/dry vacuum cleaner*

In the auto glass industry, a vacuum cleaner is a necessity, but space in the shop and on a mobile vehicle is precious, so we don't need one that is large and bulky. The perfect fit is our 1 x 1 Vacuum Cleaner - one-horsepower, one-gallon. It includes a wall-mountable bracket and a tool holder that will hold the vacuum and all tools securely in place. No more bouncing around in the back of your mobile vehicle, breaking glass or taking up room in your workspace. It comes with a 4' flexible hose with a round nozzle, a crevice tool, a gulper nozzle, reusable foam sleeve, disposable filter bag, and an 6' long power cord.

**BVS925**

**BFF928 • Filter For BVS925 • Package of 3**

These vacuum cleaners can be powered by our inverters. See below

**Equalizer® 3-Horsepower, 6-Gallon Vacuum**

*Wet or dry vacuum cleaner*

If you replace a lot of tempered door glasses or back glasses, you need a large capacity vacuum with lots of power. You can easily buy a 6-gallon vacuum cleaner in most stores, but most of them are only one or two horsepower. Our 6-Gallon Vacuum Cleaner however, is large and powerful with a 3-horsepower, 8 amp (960 watts) motor, but still small enough that it will not take up a lot of space in your mobile vehicle. Made with a low profile so it will not tip over easily, converts to a blower and comes with an 8' x 1-1/4" hose, two extension wands, a 10" squeegee, and a crevice tool. Also included is a filter that can be easily removed and cleaned. Made in the USA.

**BES924**

**BCF929 • Filter For BES924**

**12-Volt DC to 120-Volt AC Inverters**

Our Inverters have a 1-year warranty against factory defects. All inverters have automatic thermal protection, extra surge capacity, low input voltage alarm, low battery shut-down, and reverse polarity protection. The CES1475 measures 7-9/16" L x 6-1/4" W x 3" H. The CEM1476 measures 8-3/4" L x 8" W x 3-1/4" H. The CEL1477 measures 10-1/4" L x 9" W x 3" H. Each inverter includes a set of 3' hook-up wires.

**CES1475 • 1000 Watt**

**CEM1476 • 1500 Watt**

**LT1500 • 3' Long Replacement Hookup Wires for CES1475 & CEM1476**

**CEL1477 • 2500 Watt**

### Milwaukee Cordless, 2-Gallon Vacuum

This wet/dry vacuum offers long continuous run time with high air power and suction to provide quick and easy removal of dust, debris and water. A washable, reusable wet/dry HEPA filter delivers excellent fine dust collection and does not need to be changed between wet and dry applications. The stackable toolbox design, on-board hose and accessory storage offer excellent portability and convenience. A built-in blower port allows the vacuum to double as a blower, and the 1-1/4" hose allows standard vacuum attachments to be fastened. It includes vacuum, filter, hose, a crevice tool, and a wide nozzle. Uses all Milwaukee 18-Volt slide-on batteries, LI-ION or NiCd. Battery and charger not included.

**088020**

**49901900 • Filter For 088020**

### DeWalt® AC/DC Vacuum Cleaner

**Runs on an 18-Volt battery or 120-Volt outlet**

A wet-dry vacuum unlike others because you don't have to change out the filter when switching from wet to dry! After wet vacuuming, just empty the tank through the drain port. To clean the filter, simply remove, wash, and replace. The vacuum is as light as a feather, super-portable, and powerful enough to vacuum glass out of any door. And best of all, use with any of your existing DeWalt® 18-Volt batteries and chargers. Battery and charger not included.

**TS1440**

### DeWalt® 18-Volt Vacuum

This DeWalt® 18-Volt Vacuum allows for versatility with its dual clean-up method. You can vacuum using the front utility nozzle in areas of the vehicle such as the seats or floorboards, or remove and use the 30" extendable hose, which is friction fitted into the utility nozzle. The hose is made of a heavy-duty rubber that provides durability and flexibility and is great to use in hard to reach places, such as inside a door when you need to vacuum out glass. This vacuum has a 1/2-gallon capacity and includes a Gore™ HEPA wet/dry filter that traps dust down to 0.3 microns. The best part is that cleanup is a breeze! The container is easy to empty and when the filter becomes dirty, just wash it out and continue using! Comes with 1-18 Volt battery and 1-One hour charger.

**DC515K**

### Tech-Wipes™

**Formulated for the Auto Glass Technician**

Tech-Wipes™ are rugged, non-marring towels. They are packaged in a flip-top container that keeps the towels moist for months. Each container comes with 72 towels that are 10" x 12", joined together and perforated so you can tear them off to make a small towel or as large a towel as you need. Contains aloe and has a mild citrus scent.

**PB1349**

### Tech-Clean™

**Formulated for the Auto Glass Technician**

It is very important to our industry that our cleaner not contain ammonia or petroleum distillates, and none of these are found in Tech-Clean™. It is formulated around a mild soap base, yet has effective cleaning and deodorizing agents. Fine pumice is used to help remove ground-in dirt. We recommend using Tech-Clean™ with water. There is no detectable odor after you have cleaned your hands.

**SHC441 • 16 Oz.**

### Scrubs® In-A-Bucket

**The mobile, one-step cleaning solution.**

Scrubs® In-A-Bucket are pre-moistened, heavy-duty towels with pumice scrubbing power. Their powerful yet safe cleaning agents work together with an absorbent, non-scratch abrasive hand cleaning towel. They work to loosen, dissolve, and absorb grease, dirt, and urethane. The result is hands that are clean and have a pleasant citrus fragrance. After you have used a towel to clean your hands, you can use Scrubs® to degrease tools, toolboxes, equipment, work surfaces, painted surfaces, vinyl, plastics, and metal. Each bucket contains 72 towels that are 10-1/2" x 12-1/4".

**BR1046**

### ScrubRack

**Wall mounting bracket**

With this bracket you can mount Scrubs® In-A-Bucket on the wall, on your toolbox, or in the back of your mobile vehicle. Anywhere you mount it, the ScrubRack will hold your bucket of Scrubs® tightly in place. If you want to take it with you, just pull out on the bottom of the bucket and it will quickly and easily snap out of the bracket.

**SU1423**

### Squeaky™ Clean Concentrated Glass Cleaner

**Contains NO Ammonia or Alcohol and SEGC114 Certified**

Squeaky Clean™ will leave the glass clean and contaminant free and it's safe to use when bonding auto or insulated glass. It is super-concentrated - only requiring 1 oz solution per 1 gallon of water. Just add contaminant free water and you are ready to clean any glass.

**GCS314 • 8 Oz.**

**GCQ316 • 32 Oz.**

## Spray Bottles

The sprayers are made of polypropylene and the bottles are made of high-density polyethylene. The sprayer adjusts to a fine, medium, or hard mist. The small bottle holds 8 ounces and the larger bottle holds 16 ounces.

**SBS732 • 8 Oz.**

**SBL783 • 16 Oz.**

## WypAll® Shop Towels

### Jumbo Roll in Red

These shop towels are made using WypAll®'s patented HYDROKNIT® Fast-Absorbing Material, which makes them softer and more absorbent than ever. Pound for pound they absorb more water and oil than rental shop towels and are guaranteed more cost-effective. WypAll® Shop Towels are ideal for heavy wiping, prepping surfaces with solvents, and cleaning metal shavings and rough surfaces. They are also lint free making them perfect for all applications in the Auto Glass Industry. Towel size is 12.5" x 13.4" and each jumbo roll comes with 475 sheets.

**WTR920**

## WypAll® Towel Holder

Metal stand used for holding WypAll® Jumbo Shop Towel Rolls. This is a convenient and efficient dispensing system that can easily be moved wherever you need it. It also includes trash bag attachment for easy clean up. Unit measures 16.75" x 33" x 18.5" and folds for easy storage.

**WTH921**

## Lint-Free Wipes

Years ago we gave very little thought to contamination of the glass or pinchweld. We have learned a lot since then, and today we go to great lengths to prevent a glass from leaking and to make sure it bonds properly. Lint seems like a small problem, but some towels leave a large amount on the glass. Every place there is lint is a place that the glass does not bond. There can be thousands of pieces of lint in an area only an inch or so in diameter, but you only see the larger pieces. Our Lint-Free Wipes get rid of all the lint and give you a totally clean surface so your urethane will bond completely. Size 13" x 13".

**DL1093 • Package of 50**

## Scott® Shop Towels

**There are 55 sheets on each roll.**

Most technicians have a paper towel holder in their shop, in their mobile vehicle or attached to their toolbox. For those technicians we offer these 6 packs of shop towels. Each roll contains 55 sheets that measure 11" x 10.4". Scott® Shop Towels work like a cloth and are so strong they can be reused. They are great for cleaning grease, grime, urethane, and primer or any hard to remove stain. Very absorbent.

# *Protective Equipment*

### Reusable Seat Protectors

The Equalizer® reusable seat protector is the ultimate tool for service departments in the automotive industry. Using these seat protectors will reduce your costs and increase your service image, all while creating a lasting impression on your clients. You will also reduce your company's plastic waste and help your company to Go Green! All of this will differentiate you from your competitors and give your clients a reason to talk about your business. The seat protector is made of heavy duty nylon and double stitched for durability. It has a pocket on the back to fit over the seat and hold it securely in place for maximum protection.

**RSP1371**

### Slip-N-Grip® Seat Protectors

**Replace one seat cover and you have spent enough to pay for a year's supply of these.**

Think about some of the vehicles you work on. One drop of urethane or primer on a seat cover and you could lose all the profit you make that day. Urethane and primer can stain a seat cover so badly that there is nothing you can do but replace it. We're not just talking about fabric seat covers; primer can destroy the finish on a leather seat cover also. Our patented contour and square Slip-N-Grip® Seat Protectors use a unique multi-layer film structure that grips the seating surface, keeping the cover in place and protecting the seat while you work on the vehicle. The smooth top surface allows a technician easy movement when working inside the vehicle. All Slip-N-Grip® Seat Protectors are 100% recyclable.

**PX1368 • Box of 250**

### Slip-N-Grip® Steering Wheel Protectors

Your hands become dirty while you are installing glass. If you stopped and cleaned your hands every time they became dirty, you would spend more time cleaning your hands than you would doing the work. You take hold of the steering wheel to turn the switch on, to pull it into a parking place, while you are cutting the glass from inside, and dozens of other times that you do not even think about. A drop of primer can ruin some steering wheels. A greasy spot on the steering wheel will convince the customer you have done a terrible job. Keep the steering wheel clean with universal-fit Slip-N-Grip® Steering Wheel Protectors.

**PY1369 • Box of 250**

### Slip-N-Grip® Floor Mats

**Made of tough plastic, not paper**

An automobile is the second largest investment made by most households. If you treat that automobile like it is not important, chances are the owner will remember how you treated their investment. Show your customers you care by putting down some protective floor mats, and cleaning the floor of the vehicle after you are through installing a glass. Even though they may throw the mats away when they get home, they will remember you considered their automobile important, and become a repeat customer. The same patented technology used in our Seat Protectors is used in the manufacturing of our Slip-N-Grip® Floor Mats. Unlike paper mats, these plastic mats stay in place, and they do not degrade when they become wet.

**PZ1370 • Box of 500**

## WindowGuard™

### Clear plastic weather barrier

If replacement glass is not immediately available, WindowGuard™ enables the owner to drive their vehicle while waiting for permanent replacement. Also, if the vehicle needs to be stored outside, WindowGuard™ protects the interior until the glass is installed. The special no-residue adhesive makes WindowGuard™ strong enough for driving speeds, and yet it still peels clean upon removal. No need for tape or messy cleanup! Extra clear material provides good visibility. It's quick, economical, and effective. Made of a clear, flexible, self-adhesive film, WindowGuard™ is perforated every 36" to make installations fast and easy.

**CWS77 • 60' Roll**

**CWP289 • 99' Roll**

## Paint Protector

The top of an automobile is a convenient place to put your tools. Many technicians put the vehicle's cowlings, screws, and other parts on top of the vehicle when they are replacing the windshield. The problem with lying all these items on a vehicle is the possibility you will scratch the paint. Paint today can be seven layers thick and almost impossible to touch-up. Do not wait until you scratch a vehicle. Protect that paint with an Equalizer® Paint Protector that will give you years of carefree use. Made of a thick, soft, soil-proof vinyl. It comes in black to match the color of urethane. Remember what mom, dad, or somebody told you: "An ounce of prevention is worth a pound of cure." Order your ounce of prevention today!

**VTP586**

## TightSpot™

### Invented by: Temoc Reynosa

If you need to work in a small space such as a parking garage or lot where the vehicles are parked close together, you'll need a set of TightSpots™. Installed in the proper position, they will prevent damage to the vehicle being worked on or the one parked next to it. Just stick the vacuum cup on the vehicle you want to protect and you can then keep the doors open while you install the glass. They are made of dense foam rubber on one side and a soft vacuum cup on the other.

**TSP292 • Set of 2**

## Protect-A-Dash™

### Invented by: Tim Slaughenhaupt

Many windshields cannot be removed without cutting across the bottom of the windshield from the inside. If you are using wire or a tool with an exposed blade there is always a possibility you could cut or damage the dash. Each side of the flexible Protect-A-Dash™ is made to perform a specific function. The side

that goes against the windshield is a slick, tough nylon so the tool or wire will slide easily across the dash protector. It is rounded at the bottom to fit down into the corners of curved dashes. The back side is a non-skid foam pad that both protects the dash and prevents the Protect-A-Dash™ from slipping out of position. CU1077 measures 16" x 9-1/2", and BDP1078 measures 32" x 14". Made in the USA.

**CU1077**

**BDP1078**

### Equalizer® Ricochet™

#### High-Impact Plastic Pinchweld Protection System

Invented by: Gilbert Gutierrez

Protecting the pinchweld when removing the glass has always been a problem for technicians. Every protector they used could not withstand repeated hits by a power tool blade and would jump out of the pinchweld, leaving the paint exposed to potential harm. Tape worked to some extent, but would not hold sufficient downward pressure to keep the pinchweld protector in place. The solution to this problem is our Ricochet™ Pinchweld Protection System. This system includes 4 different lengths of a high-impact plastic that will absorb repeated striking from the blade, and uses a vacuum hold-down tool to exert pressure to keep the pinchweld protector in place. There are many places where this will be useful, but most important are the vehicles that have no moulding around the glass. Even a small nick on those vehicles is easy to see from outside and can result in the need to have that part of the vehicle repainted. System includes: one 12", 18", 24", and 48" long pinchweld protectors, and 4 vacuum hold-down tools.

**PHV859 • Ricochet™ Pinchweld Protection System**

**PHS814 • 12" Protector**

**PEL815 • 18" Protector**

**PTF816 • 24" Protector**

**PFE820 • 48" Protector**

**PHO813 • One Vacuum Cup**

### Equalizer® BounceBACK™

#### Metal Coated Pinchweld Protection System

Invented by: John Hutzel

BounceBACK™ is essentially the same product as the Ricochet™ but made out of a pliable metal, coated with impact absorbing tape. System includes: one 12", 18", 24", and 48" long, coated pinchweld protectors, and 4 vacuum cup hold-down tools. After extended use, the coating on the pinchweld protectors can become worn. When this happens you can remove the old coating and replace it with a fresh coating of impact absorbing tape. Tape sold separately.

**MDP181 • BounceBACK™ Pinchweld Protection System**

**MTI185 • 12" Protector**

**MET184 • 18" Protector**

**MTF183 • 24" Protector**

**MLP182 • 48" Protector**

**PHO813 • One Vacuum Cup**

**MCT720A • 2" Wide and 180' Long Tape**

### SUPERWEDGES™

There are a lot of ways to hold a windshield out while you cut the wide band of urethane at the bottom. SUPERWEDGES™ are rigid enough to hold the glass up, but soft enough that they will not scratch the paint on a vehicle. Ridges are cast into the SUPERWEDGES™ and are about 1/16" deep on each side. This gives them gripping power to stay in place.

**JT1144 • Set of 2**

**Neck Savers™**

Many windshields today must be cut out from the inside. This is especially true when the urethane is above the bottom edge of the glass, but below the dash. Many technicians use their heads to push against the glass while they are cutting the urethane. This can cause damage to the neck and should never be done. Neck Savers™ are made of plastic so they will not damage the paint. To use them, you cut the top and sides of the glass, push out on the glass and put the Neck Savers™ in place. As you make your cuts along the bottom, push out on the glass with your hand and the Neck Savers™ will roll down the post and keep the glass elevated. As more of the urethane is cut, just put a small amount of upward pressure on the glass (with your hand) and the Neck Savers™ hold the glass up. Made in the USA.

**NS362 • Set of 2**

**Equalizer® Pumper™**

*Invented by: Eric Asbery*

The thick band of urethane across the bottom of a windshield is difficult to cut from the outside of the automobile and must be cut free from the inside. Technicians sometimes use the top of their heads to push out on the top of the windshield as they cut across the bottom. The Equalizer® Pumper™ helps prevent neck injuries by utilizing an inflatable bag to push out on the glass for you. It exerts over two hundred pounds of outward pressure over a one-foot area. You will find it useful in any area where you want to exert constant outward pressure while cutting urethane. The Equalizer® Pumper™ is made with a tough, vinyl-encased exterior.

**LB779**

**Equalizer® Apron**

This is the easiest way to keep your clothes clean and you looking professional. This apron features tie straps that are long enough to reach around most installers. It has two pockets to hold anything you want to keep within easy reach. The apron is black to match the color of urethane and has a distinctive Equalizer® logo embroidered in red.

**EA665**

### What Size Gloves Do You Wear?

If you do not know what size glove you wear then you can use this method to decide. This method works equally well for mechanic, anti-vibration and nitrile gloves.

**Medium 8" to 9" • Large Gloves 9" to 10" • Extra Large Gloves 10" to 11"**

### Leather Full-Finger Anti-Vibration Gloves

*Nylon mesh back gives you the flexibility to grip tools easily.*

These are the highest-quality anti-vibration gloves. They have Sorbothane® padding in the palm and Gel-Foam in the thumb, thumb-joint, and all fingers. They have a nylon mesh back and an elastic cuff both with a hook-and-loop closure tab.

**RF1376 • Medium**

**RG1377 • Large**

**RH1378 • Extra Large**

Kevlar® Lined

### Kevlar® Lined Anti-Vibration Gloves

Have you ever had to remove a glass that was badly broken? Sure you have, lots of times. Sometimes it is necessary to use a power tool to remove those badly broken glasses, not because they are badly broken, but because of the wide urethane. Rub your hands along that glass and you are sure to get cut. These gloves will prevent those cuts. They combine the best of all worlds: Kevlar® lined, anti-vibration and Sorbothane® padding in the palm, thumb and all fingers. They are made of full-grain cowhide.

**RC1373 • Medium**

**RD1374 • Large**

**RE1375 • Extra Large**

### Full-Finger Mechanic's Gloves

*Machine wash and dry*

Some of the work an Auto Glass Technician does is delicate and could not possibly be done while wearing gloves, but a lot of the work is rough and leaves you prone to cuts, abrasions, and damage to your hands. Our Full-Finger Mechanic's Gloves have a stretch-knit padded back, synthetic leather palm, and elastic cuff with hook-and-loop closure.

**RI1379 • Medium**

**RJ1380 • Large**

**RK1381 • Extra Large**

### Premium Cowhide & Leather Gloves

These premium gloves provide heavy-duty protection, perfect for wire removal jobs. The keystone thumb allows for a better fit and flexibility while the elasticized wrist helps to keep out dirt and debris. Made with an improved thread so seams last longer!

**CHL1131 • Large**

**CHX1133 • Extra Large**

### Safety Gloves

These comfortable, protective gloves are crafted from cotton and leather. A unique leather strip is sewn across the top of the gloves to protect the knuckle area from injury. One size fits all.

**LSG734**

### Black Nitrile Gloves

#### Chemical Resistant & Powder-Free

Black nitrile gloves are a new generation of nitrile gloves for the Auto Glass Industry. Nitrile gloves were originally used to handle glass and prevent contamination, but as technicians adjusted to them they have become standard apparel for technicians wishing to prevent exposure to the many chemicals used in our industry. Our gloves have textured fingertips which provides for precise handling of small items, are highly chemical and puncture resistant, and contain no MBT. They are Latex free, and powder free and have unsurpassed comfort for extended wear. Tape and labels do not stick to or tear these gloves and they have no offensive odor. Made of 100% nitrile.

- BNG418 • Box of 100 Gloves • Large**
- BNL820 • Box of 100 Gloves • Extra Large**
- BNX408 • Box of 100 Gloves • Extra Extra Large**

See top of previous page for size information

### Blue Nitrile Gloves

#### Chemical Resistant & Powder-Free

Are your hands blackened or chapped from the harmful chemicals that you use every day? Protect yourself by wearing a pair of our Powder-Free Nitrile Gloves. You can see and feel the difference in your hands. Made of 100% nitrile and are 100% latex-free. So thin that they do not interfere with anything you're working with.

- CB1057 • Box of 100 Gloves • Large**
- CC1058 • Box of 100 Gloves • Extra Large**
- CXX1070 • Box of 50 Gloves • Extra Extra Large**

### Magnetic Glove Dispenser

Now you can end the problem with boxes of nitrile and latex gloves sliding all over your mobile vehicle or "walking off" when you need them. Two large magnets conveniently hold the dispenser to your toolbox, any ferrous metal surface, or mount it on a wall using screw slots. The dispenser has three adjusting springs to hold different size boxes. Made of powder-coated steel.

**GHB559**

### Arm Protector Gloves

We would all like to put in windshields and never install a door glass, but unfortunately door glass installation is a part of our business. When you work inside doors you will always have cuts on your arms. The cutouts that allow you to access the inside of the door can sometimes be razor-sharp. Our Arm Protector Gloves are made of durable Kevlar® with a double wall of protection and will protect you from getting cut by these pieces of metal.

**LU1271**

### Kevlar® Gloves

Whether removing shattered windshields or just picking up a piece of glass, you need a pair of gloves that will hold the glass firmly. When a glass slips, that is when it cuts through gloves. These seamless knit gloves have a natural rubber coating for excellent wet or dry grip and are made of 7-gauge 100% Kevlar®. It is one of the most cut resistant materials ever developed.

- IZ1217 • Large**
- JA1218 • Extra Large**

### Safety Glasses

These impact-resistant safety glasses fit comfortably over most prescription eyewear. An advanced temple design holds well for extraordinary comfort. Adjustable eye pieces for maximum fit and comfort. Meets the ANZI 87.1 standard for primary eye protection.  
**ESG735**

### Kool Safety Glasses

If you must wear safety glasses, then why not wear a nice looking pair? Our clear safety glasses are the same style that is included in our Equalizer® line of Auto Glass Cut-Out Knives. Our FGS132 pair is the same type, but with gray-tinted lenses. They meet the ANZI 87.1 standard for primary eye protection.

**FSG130 • Clear Lenses**

**FGS132 • Gray Lenses**

### SAS Stingers Safety Glasses

*Sleek, sporty, wraparound style lenses.*

Are you having trouble getting your technicians to wear safety glasses? Try a pair of our SAS Stingers Safety Glasses and I am guessing your problem will be solved. With the look of sun glasses but the protection of safety glasses. They meet the ANZI 87.1 standard for primary eye protection.

**JB1219 • Sunglasses, Blue Lenses**

**JC1220 • Clear Lenses**

### Equalizer® HEADLIGHTS™

What an idea...combine two items that every glass technician should not be without! The Equalizer® HEADLIGHTS™ are a pair of lightweight safety glasses combined with two ultra-bright LED lights, which burn longer and brighter than conventional bulbs. Each light has its own on/off switch and the batteries are replaceable. Equalizer® HEADLIGHTS™ are a safe, hands-free lighting solution. Includes four 3-Volt CR1632 batteries.

**TW1442**

**Glasses Not Included**

### Equalizer® Chums®

*Sun and safety glasses holder*

Equalizer® Chums® have a small diameter rubber tube inside the cotton fabric that holds the earpieces of the glasses. When you do not need your sunglasses or safety glasses, just drop them down around your neck and they are there when you need them again. A round friction slide allows you to set the length they will hang down around your neck. Made in USA.

**CSH38**
